Professional Summary | Highly motivated Computer Science Engineer (Honours) with a 9.48 CGPA and a strong foundation in full-stack software development. Proven expertise in building robust applications using Java and Python, ranging from web-based financial tools to AI-driven utilities, with a focus on writing clean, modular code and optimizing system performance.

EDUCATION

Sant Longowal Institute of Engineering and Technology

July 2023 – July 2026

B.E. (Computer Science and Engineering - Honours)

9.48 CGPA

Sant Longowal Institute of Engineering and Technology

July 2020 – July 2023

Diploma in Computer Science and Engineering

9.69 CGPA

Relevant Coursework

- Data Structures
- Data Mining
- Internet of Things
- Database Management
- Artificial Intelligence

EXPERIENCE

Thapar Institute of Engineering and Technology

June 2025 – July 2025

AI/ML Intern

Patiala, Punjab

- Engineered robust data preprocessing pipelines using Python, implementing null handling, encoding, and scaling to ensure high-quality dataset integrity.
- Automated repetitive data processing workflows by developing reusable functions, significantly reducing manual effort and improving pipeline efficiency.
- Evaluated and optimized machine learning models in scikit-learn across classification and regression tasks to maximize predictive accuracy.

PrernaGati Technologies

June 2024 – July 2024

Python Intern

Patiala, Punjab

- Developed a modular Command-Line Banking System featuring secure account management, deposits, and withdrawals using core Python data structures.
- Architected the application using Object-Oriented Programming (OOP) principles to ensure scalability and maintainable code structure.
- Enhanced application reliability by implementing comprehensive exception handling to manage edge cases and prevent runtime errors.

PROJECTS

Handwriting Recognition Tool | Python, OpenCV, Tesseract OCR

- Developed an end-to-end recognition tool that transforms handwritten images into editable digital text using Python.
- Streamlined image processing workflows with OpenCV and utilized Tesseract OCR for high-precision text extraction.
- Improved text extraction accuracy by iteratively adjusting preprocessing techniques, including grayscale conversion and thresholding.

Currency Converter Web Application | Java, Servlets, Applets

- Architected a dynamic web application to perform real-time currency conversions across multiple international regions.
- Implemented back-end logic using Java Servlets to process currency data and facilitate seamless user interactions.
- Integrated live exchange rate updates into an interactive user interface, ensuring high data accuracy and a responsive user experience.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, HTML/CSS

Frameworks: PyTorch, TensorFlow, Keras, Scikit-learn, Pandas, NumPy

Tools: GitHub, VS Code, Visual Studio, PyCharm, IntelliJ

Soft Skills: Adaptability, Time Management, Problem-Solving, Collaboration

Areas of Interest: Software Development, Artificial Intelligence, Machine Learning, Data Science

Extracurricular

- Core Committee of MadhuraM'25
- Domain Coordinator of Plexus in TechFest'24
- NCC Cadet
- NSS Volunteer
- SLIET Software Development Club Member

ACHIEVEMENTS

- GATE 2025 Qualified
- Best Domain Award in TechFest'24

- 1st Position in Dummy Company Contest at Internwell
- 3rd Position in Genesis, TechFEST'23
- NVIDIA Deep Learning Institute Certification (Deep Learning Fundamentals)
