Professional Summary | Results-oriented Computer Science Engineer with a strong foundation in full-stack web development and software engineering. Expert in Java and Python, with a proven ability to develop scalable web applications and automate data-driven workflows. Committed to delivering high-quality, user-centric solutions through clean code and efficient problem-solving.

EDUCATION

Sant Longowal Institute of Engineering and Technology

July 2023 – July 2026

B.E. (Computer Science and Engineering - Honours)

9.48 CGPA

Sant Longowal Institute of Engineering and Technology

July 2020 – July 2023

Diploma in Computer Science and Engineering

9.69 CGPA

Relevant Coursework

- Data Structures and Algorithms
- Web Technologies and Internet of Things
- Database Management Systems (DBMS)
- Data Mining and Artificial Intelligence
- Software Engineering Principles

EXPERIENCE

Thapar Institute of Engineering and Technology

June 2025 – July 2025

AI/ML Intern

Patiala, Punjab

- Engineered automated data preprocessing pipelines using Python, implementing robust null handling and scaling techniques to ensure high data integrity for model training.
- Developed reusable processing functions that streamlined manual workflows, significantly reducing the time required for data preparation and feature engineering.
- Optimized prediction accuracy by training and benchmarking multiple machine learning models, including classification and regression algorithms using scikit-learn.

PrernaGati Technologies

June 2024 – July 2024

Python Intern

Patiala, Punjab

- Architected a robust Command-Line Banking System by applying Object-Oriented Programming (OOP) and advanced exception handling to ensure application stability.
- Developed modular components for account management, deposits, and withdrawals, utilizing optimized data structures such as lists, sets, and dictionaries.
- Streamlined code maintainability by implementing modular design patterns, facilitating easier system updates and debugging.

PROJECTS

Currency Converter Web Application | Java, Servlets, HTML/CSS, AJAX

- Developed a dynamic web application for multi-country currency conversion, utilizing Java Servlets to manage server-side logic and real-time processing.
- Integrated live exchange rate updates and implemented an interactive, responsive user interface to enhance the overall user experience.
- Leveraged asynchronous communication to provide seamless data retrieval without page reloads, improving application responsiveness and performance.

Handwriting Recognition Tool | Python, OpenCV, Tesseract OCR

- Engineered an OCR tool that successfully digitizes handwritten notes into editable text formats using Python and Tesseract.
- Implemented sophisticated image processing techniques, including grayscale conversion and thresholding via OpenCV, to maximize text extraction clarity.
- Conducted iterative testing and tuning of preprocessing parameters to significantly improve recognition accuracy across various handwriting samples.

TECHNICAL SKILLS

- Languages: Java, Python, C/C++, HTML5, CSS3, JavaScript
- Web Technologies: Java Servlets, Applets, AJAX, RESTful APIs, XML
- Libraries & Frameworks: Pandas, NumPy, Scikit-learn, TensorFlow, Keras, PyTorch
- Tools & Version Control: GitHub, Git, VS Code, IntelliJ IDEA, PyCharm, Visual Studio
- Core Competencies: Software Development, OOP, Data Structures, DBMS, Problem-Solving

Extracurricular

- Core Committee Member, Madhura'25
- Domain Coordinator, Plexus - TechFest'24
- NCC Cadet (National Cadet Corps)
- NSS Volunteer (National Service Scheme)
- Member, SLIET Software Development Club

ACHIEVEMENTS

- GATE 2025 Qualified
- Recipient of Best Domain Award, TechFest'24
- 1st Position, Dummy Company Contest at Internwell
- 3rd Position, Genesis, TechFEST'23
- NVIDIA Deep Learning Institute Certification (Deep Learning Fundamentals)
